Hello John,

We don't have a preference for a particular mode, other than that the information be in writing. Please ensure that Shell provides specific information regarding the type of equipment; any qualifications on when/where the equipment may be used; duration of activity; estimated discharge volumes; estimated areal extent and thickness of deposition; and any other related disturbance. The information must be sufficiently specific to allow for a meaningful comparison with the existing ODCE and general permit analyses. Please also ensure that the information provided reflects the actual proposal/activity that Shell anticipates including in an NOI. Feel free to contact me if you have other questions. - Kim

**Subject:**

Good Morning Kim,

Can I "ping" you on the mode/method for us to provide our responses to you regarding the "digger" mud-line cellular technology and attendant volumes and their potential impacts on the general exploration NPDES permits?

Thank you,

John
